### PROFILE

I believe opportunities are created through **proactive action**. I constantly challenge myself, learn from failure, and grow through experience. As a recent Software Engineering graduate, I am seeking opportunities where I can take ownership of my work and make a direct impact on user experience. I have hands-on experience building web applications using React and REST APIs, working within Agile teams, and contributing to code quality through testing, debugging, and code reviews. I enjoy collaborating with others, solving problems, and continuously improving as a developer while building reliable and meaningful software.

---

### PROFESSIONAL EXPERIENCE

#### Software Engineer Intern, Harmoney

Auckland, Nov 2025 to Feb 2026

*Tech Stack: TypeScript, React, Next.js, Nest JS, Docker, MySQL, Git, GitHub Projects*

- Contributed to full-stack feature development in a production fintech environment, delivering customer-facing functionality across backend and frontend systems
- Improved system performance by implementing regex-based validation and optimising database queries, reducing customer search time
- Designed and implemented a role-based authorization system to ensure secure financial operations across multiple user flows
- Developed a mortgage declaration feature, ensuring consistency across multiple customer journey flows
- Collaborated with cross-functional teams in Agile sprints, contributing to testing, debugging, code reviews, and stakeholder demonstrations to ensure high-quality releases

#### Sales assistant , Eureka Ltd

Auckland, Jul 2024 to Present

- Developed strong customer communication and problem-solving skills in a fast-paced retail environment
- Trained new team members and supported onboarding through clear communication and practical guidance.

#### Waiter, Cornwall Park Cafe

Auckland, Feb 2023 to Jun 2024

- Handled high-volume customer service while coordinating with team members to ensure smooth operations.

---

### PROJECTS

#### Roamer - Location-Based Mobile Running App (Personal Product)

Problem: Many runners repeatedly use the same routes, reducing motivation to explore new areas.

- Designed and developed a location-based mobile application that generates exploratory running routes using real-time GPS data
- Integrated Mapbox APIs to support loop and destination-based route generation for outdoor running experiences
- Conducting beta testing and collecting user feedback to validate engagement and guide product development

## Beyond Vision - AI Accessibility App, AI Hackathon

Problem: Identified the lack of digital accessibility for visually impaired users

- Co-developed a web app that delivers richer image descriptions through a swipe-based interface
- Used OpenAI API over Google Cloud Vision after testing both: OpenAI provided more contextual, sentence-level captions, smoother TTS integration, and stronger language flexibility — essential for adding Māori translations

## Intelligent Sports Management Platform, (client-based project)

Client: Club Filipino Tauranga Inc. / Problem: manual scoring management system

*Tech Stack: React.js·Django·MySQL·REST API·Axios·VPS·Github Aciton·WSGI·CI/CD*

- Led deployment strategy on VPS namecheap cloud hosting as DevOps developer
- Configured and maintained CI/CD pipelines using Git, GitHub Actions for automated deployment
- Monitored application health using logging tools and planned Prometheus/Grafana integration for real-time metrics

---

## EDUCATION

### (Level 9) Master of Software Engineering

Jul 2024 to Aug 2025

Yoobee College, Auckland

### Bachelor of Science in Software Convergence

Mar 2016 to Dec 2022

Hongik University, Korea

- Focused on software fundamentals, data structures, algorithms, and participated in coding competitions and exchange programs in China and Nepal

---

## CERTIFICATES

The Ultimate React Course 2025: React, Next.js, Redux & More, Udemy

Jun 2025

Django with React: An Ecommerce Website, Udemy

Jun 2025

---

## EXTRA ACTIVITIES

### 1st Place Winner, Trade Me Think-a-thon (Summer of Tech, 2025)

- Proposed an AI-powered career guidance feature targeting Gen Z job seekers

### Tech Meetups & Trends Enthusiast

- Actively attend tech meetups to explore emerging tools and trends, driven by **curiosity** and a passion for **continuous learning**

---

## VOLUNTEERING

### Volunteer – School Support Program, Nepal (2016)

- Supported a local school following the 2015 earthquake through cultural exchange and facility improvements.

---

## HOBBIES

I love camping and hiking because they give me time for meaningful conversations with others.
